Ecological Modeling 99 (1997) 293

**ECOLOGICAL  
MODELLING**

## Author index

Volume 99 (1997)

- 
- |                     |                           |
|---------------------|---------------------------|
| Abrahamsen, G. 101  | Li, C. 137                |
| Bailey, M.C. 217    | Lin, C.-R. 263            |
| Bastianoni, S. 33   | Lindström, M. 171         |
| Beisel, J.-N. 289   | Liu, S. 151               |
| Beliaeff, B. 161    | Mac Nally, R. 229         |
| Brenkert, A.L. 113  | Magid, J. 247             |
| Brown, T.N. 275     | Marchettini, N. 33        |
| Buongiorno, J. 263  | Moreteau, J.-C. 289       |
| Comins, H.N. 51     | Mueller, T. 247           |
| Cruzado, A. 19      | Nielsen, N.E. 247         |
| Fuliu, X. 41        | Omori, K. 203             |
| Gaunt, R.E. 275     | Perera, A. 137            |
| Grondona, M.O. 71   | Rose, K.A. 113            |
| Håkanson, L. 171    | Sogn, T.A. 101            |
| Hamilton, D.P. 217  | Soudant, D. 161           |
| Jaworska, J.S. 113  | Svirezhev, Y.M. 7         |
| Jensen, L.S. 247    | Ter-Mikaelian, M. 137     |
| Karafyllidis, I. 87 | Thanailakis, A. 87        |
| Kulasiri, D. 275    | Thomas, G. 161            |
| Legović, T. 1, 19   | Trouslard-Kerdiles, V. 71 |

## Subject index

### Volume 99 (1997)

- 
- Bayesian, 161
  - BLUP, 71
  - Catchments, 171
  - Cellular automata, 87
  - CO<sub>2</sub>, 51
  - Coastal sea, 1
  - Confinement, 229
  - Contaminant effects, 113
  - Copepod, 203
  - Covariance function, 71
  - Crop models, 71
  - DAISY, 247
  - Density-dependent model, 263
  - Dinophysis*, 161
  - Disturbance pattern, 137
  - Droop growth, 19
  - Dynamic, 161
  - Ecological indicator, 41
  - Ecological scale, 229
  - Economics, 263
  - Efficiency of ecosystems, 33
  - Emergy, 33
  - Empirical models, 171
  - Enclosure, 229
  - Energy balance, 203
  - Environmental systems, 87
  - Eutrophication models, 1
  - Evenness measures, 289
  - Exergy, 7, 33, 41
  - Experiment, 229
  - Fire regime, 137
  - Florida flatwoods, 151
  - Forest, 51
  - Forest ecosystems, 263
  - Forest fire, 87
  - Forest management, 263
  - Frequency distributions, 171
  - General linear model, 71
  - General theory, 7
  - Grazing, 229
  - Growth, 263
  - Hydrodynamics, 217
  - Individual-based model, 113
  - Izmit Bay, 1
  - Lake Chaohu ecosystem, 41
  - Landscape structure, 137
  - Largemouth bass, 113
  - Le Chatelier's principle, 7
  - Liebig law, 19
  - Light particulate organic matter, 247
  - Lysimeters, 101
  - Matrix, 263
  - Mature size, 203
  - Metabolic quotient, 247
  - Michaelis–Menten–Monod uptake, 19
  - Microbial biomass, 247
  - Microbial ecosystem simulation model, 275
  - Mineral N, 247
  - Minimal diversity, 289
  - Model, 51
  - Modeling, 151
  - Modelling, 87, 161
  - Model validation, 101
  - Morphology, 275
  - Morphometry, 171
  - MSEP, 71
  - Nitrogen, 51, 101
  - Non-linear model, 263
  - NuCM, 101
  - Nutrient, 51
  - Nutrient cycling, 101
  - Oilseed rape, 247
  - Ontario, 137
  - Phytoplankton, 1
  - Phytoplankton model, 19
  - polychlorinated biphenyls, 113
  - Population, 263
  - Population dynamics, 113
  - Rainfall interception, 151
  - Redfield ratio, 19

Regional limnology, 171  
Resuspension model, 217

Sediment transport, 217  
Self-organization, 33  
Sensitivity, 7  
Shallow lakes, 217  
Shannon index, 289  
Simulation, 87, 229  
Simulation model, 137

Soil respiration, 247  
Spatial soil fungal, 275  
Stability, 7  
Structural exergy, 41  
Sulphate, 101

Three-dimensional tree root architecture, 275  
Time series, 161  
Toxicity, 1  
Transformations, 171
